

RINEX/DORIS

Files available on the CB ftp site at <ftp://ftp.cls.fr/pub/ids/data>

- A daily RINEX file for 2001/08/21
[for tests of RINEX DORIS format/RINEX DORIS JASON2 for test 20010821.txt](#)

Measurements are derived from a simulation with the DORIS DGXX instrument and a network of stations simulated with two frequency transmitters.

- ! Anomaly : Discontinuity of the pseudo-range at T0 when switch of one UT to another for the same beacon.
It will be soon corrected in the STILO processing chain
- ! Satellite's name = Jason2 but Cospar number = Topex's number

- A description of the RINEX format:
[SALP-SP-M-EA-15578-CN Ed1 Rev1.pdf](#)
- A document about the processing description and the pseudo-range measurement
[SALP-SP-M-EA-15577-CN Ed1 Rev2 EN.pdf](#)

CNES will provide also the orbit computed with this data set.
