

Questions for the IDS AWG

QuickTime™ and a
TIFF (Uncompressed) decompressor
are needed to see this picture.

IDS AWG @ESOC, Darmstadt, Germany

May 26-27, 2010

Questions we wish to address (1)

1. What have we learned from the work for the development of ITRF2008? What is the evaluation of our contribution and the work people have done? What might have done or should do differently in the future?
2. Can we commence routine manufacture of an IDS combination? On what time schedule? Monthly? Tri-monthly? How many centers can participate and what is the expected latency?
3. What is our evaluation of Jason-2? Is it ready to be added to the (new) DORIS combination?
4. What modelling tests and issues should focus on, for the DORIS workshop and in the more distant future?

Questions we wish to address (2)
